

LPT45

4,500 lb. Capacity Integrated Lithium-ion Pallet Truck

LI-ION

CAPACITY

4,500 lb. at 24" load center.

BATTERY

24V 100Ah Li-ion battery with internal, 120VAC 30A plug-in smart charger.

SPEED

- Travel - 3.7 mph empty / 3.4 mph loaded
- Lift - 4.3 feet/min
- Lowering - 7.7 feet/min

WHEELS

Drive - 9" x 2.95" polyurethane
Load - (2) 3.1" x 3.3" polyurethane
Casters - (2) 2.9" x 1.2" polyurethane

HYDRAULICS

DC pump and chrome plated cylinder provide smooth and efficient lifting.

DRIVE

24 Volt, AC drive motor delivers high torque and efficiency to extend duty cycle.

ELECTRICAL

24V ZAPI travel control provides high performance throughout the entire speed range. Travel speed remains constant relative to throttle position, regardless of load. Separately fused power control circuits, quick disconnect EPD power cut-off and control head mounted hour meter/battery discharge indicator with Bluetooth connectivity via phone app.

OPERATOR CONTROLS

Travel, lift and lower functions are located on the ergonomic control head. All operator controls are accessible without having to lift one's hand from the handle grips. The control head is designed to allow for easy operation with either hand and includes a bellybutton reversing switch, dual butterfly travel controls, horn, battery discharge indicator and key switch. The low-mounted tiller arm offers excellent operator comfort and minimum steering effort.

FORKS

Designed for use with standard 48" pallets and other common skids and containers, the forks can achieve a maximum elevation of over 8", are built for heavy-duty use and come standard with a robust fork entry roller for reliable pallet entry.

BRAKES

Electromagnetic brake provides good stopping power when handle is upright or lowered beyond the operating range.

SERVICEABILITY

Removable covers and modular design of components offer easy maintenance with simple hand tools. Two-piece drive wheel reduces the complexity of tire changes.
